

## Drinking Water NOTIFICATION

LOCATION

The City of Yorkton is conducting work or repairs on the water supply system in this area.

**THIS DRINKING WATER NOTIFICATION (DWN) IS TO ADVISE YOU THAT YOUR WATER SERVICE MAY HAVE BEEN TURNED OFF AS OF:**

DATE

TIME

1. Water service expected to be turned on:  
 SAME DAY     WITHIN 24-48 HOURS
2. This DWN remains in effect until a **GREEN DWN Lifted Notice** is delivered to your home, normally within 3 - 6 days from date turned off.

## INFORMATION ON THE WATER SERVICE INTERRUPTION

As the City of Yorkton completes the required work or repairs to the water supply system in this area, water service to your residence or business will be interrupted. Normal service will not be available until these repairs are completed. Every effort is being made to complete the repairs as quickly as possible.

If you are an apartment or condominium owner, please advise all residents in the building.

When repairs are complete the City will flush the watermain and conduct water quality testing, at which time water service will be restored. Please follow the instructions below prior to using the water. Even if water service has been restored, the City advises you to continue to boil your water until the **GREEN DWN Lifted Notice** is delivered.

## PLEASE FOLLOW THESE INSTRUCTIONS

- Bring water to a rolling boil.
- Continue to boil for at least 1 minute.
- Let water cool before using.
- Do not drink water from public drinking fountains in this area.
- While bathing, avoid swallowing the water.
- Regular tap water can still be used for washing clothes.
- If you do not wish to boil your water, use an alternate water supply known to be safe (i.e. bottled water).

While filtered water systems are effective in filtering some impurities, it is recommended you contact the manufacturer for more information.

This is a localized NOTICE, and only households and businesses in the affected area will receive this notice. Once quality testing results have been received, a green notice will be handed out.

## WHAT TO DO WHEN THE WATER RETURNS

Even if water service has been restored, the City suggests that you boil your water until the Green DWN Notice is delivered.

If the water is cloudy or contains grit, continue to run the hot and cold water taps until the water runs clear. You may need to run the hot water long enough to completely exchange the water in the hot water heater.

More information will be provided in the **GREEN DWN Lifted Notice** that will be delivered to your home when it is deemed safe to consume the water.
